

Patio Heater Operating Instructions

Note: If it is windy or located by the water, the pilot light will not stay lit and the heater will not operate.

1. Turn propane tank on in base of unit.
2. Turn knob to low setting and push knob in for 30-60 seconds until you hear the gas.
3. Push ignitor button, if that does not work use a long lighter to light the burner.
4. Once fire ignites, then release the knob.
5. Turn knob to the preferred level of heat (low to high)

If you continue to have issues please call the office at 203-368-6111.
